

## Psychology – Designing an Experiment

Design & describe an experiment to measure the relationship between rehearsal/repetition of a list of words and later recall of that same list of words. In your answer, you should formulate a hypothesis and include a description of each of the following:

- A. Population
- B. Subject selection
- C. Independent Variable
- D. Dependent Variable
- E. Experimental Group
- F. Control Group
- G. Potential confounding variable
- H. A method of reducing experimenter bias
